

Hazard Warning

- Analyze and classify hazard warning events received in real-time from vehicles on the road
- Deployed using the Hops Platform in our datacenter in Luleå
- Prototype tested in a live scenario with Scania trucks, Volvo trucks, and Volvo cars

Hops Platform

- Multitenancy: allowing multiple car manufacturers to collaborate
- Kafka: Store and buffer streaming events
- Flink: Streaming analytics + data generation for testing
- Kibana/Elasticsearch: Real-time visualization
